

From sign-in to a full roster in *about ten minutes*.

Proteus Crew replaces the Tuesday text chain: your crew taps In / Maybe / Out from one link, and you watch the season's roster fill in real time. Three steps — set up your boat, invite your crew, run the season. Here's every tap inside them.

1 Sign in — no password

Go to app.proteus-marine-intelligence.com, enter your email, and tap the magic link we send you. That's the whole login.

3 Load your season

Import your club's published calendar in one tap, add your own practices, and **remove races you're not doing**. Dock call moved? Edit the race — every RSVP stays put. Distance race needs more hands? Set that race's spots individually.

5 Invite your crew

Copy your **invite link** and text or email it. First open, they type their name, pick a handle if they like, and they're aboard — no account, no app store.

7 Watch the roster fill

RSVPs land live on your dashboard. When a race hits its limit, extra Ins go on a **waitlist in fair order**, and the first in line is promoted automatically when a spot opens.

2 Set up your boat

Boat name, club, season, and your **default crew spots** per race. You can change any of it later.

4 Add yourself as crew

One tap on the Crew tab puts you on your own roster, so your In / Out shows next to everyone else's.

6 Personal links do the remembering

Everyone who joins automatically gets a **personal link** that knows who they are. Crew should **Add to Home Screen** from it — a one-tap icon straight to their races.

8 Reminders run themselves

Anyone who hasn't answered gets a **nudge two days out**; confirmed crew get a **race-morning email** with the day's times. You get an alert if the roster changes inside 48 hours.

GOOD TO KNOW

- **Works at the dock.** No signal? The latest roster is saved on-device, and everything syncs when you're back online.
- **Crew privacy by default.** Crew can pick a handle other crew see; real names stay between you and the boat.
- **Who's aboard, visible to all.** Your crew see the lineup for every race themselves — no more "who else is going?" texts to you.
- **Lost a link?** Every crew member's personal link can be re-copied or reissued from your Crew tab anytime.
